

We would like you to write to your parents to explain why it is important to neuter your cat.

Information that you might need:

It is important to neuter a male cat so that:

- They do not wander so far away from home
- They stop fighting over female cats, so there is less chance they will get bitten and hurt
- There may be fewer car accidents as they do not wander away so much when neutered
- They may stop spraying in the house, and making your home smell bad
- It stops them getting female cats pregnant
- They are less likely to get some cancers

It is important to neuter a female cat so that:

- It stops them from having kittens and reduces the number of kittens being born, that there are no homes for
- They stay healthy as they are not having so many kittens
- They are less likely to get some cancers

A cat does not need to have kittens at all, in fact they are healthier if they haven't been pregnant.

Question:

What does 'Neuter' mean?

Write your letter, including some of the information above.
